LETTER OF RECOMMENDATION

As an assistant professor at Vishwakarma Government Engineering College, I recommend **Mr. Sathiya Parth Deepakbhai** for pursuing his higher studies at your esteemed University. He is one of the most promising students I have come across. I have known him for the last eight months. I have taught him wireless communication subject in the 7th Semester.

During the interaction with Parth, I have been impressed by his presence of mind, intellectual capabilities and a firm grasp of the core subjects of computer science. His academic performance and Extracurricular event participation have made a remarkable impression on me. He is a very hardworking and punctual student.

I can confidently say that he has performed well in all the subjects along with active participation in my class as well as in different complex tasks. He has shown excellent command over a wide range of domains. Remarkable things in Parth are his consistent grades and eagerness towards learning new things and exploring the latest trends and technologies. He has extraordinary presentation and communication skills which were observed in various presentation given by me as a part of the class assignment and his presentation was the best in the class.

Besides academics, Parth has been instrumental in the organization of various activities and events around the college, especially for the VGEC Alumni Clubs. His demeanor in such situations is calm and energetic, which inspires his team members to rise to the occasion and perform at their best.

Parth is a confident, well-disciplined and bright student. I found him interacting and sharing his knowledge with others. His organizational abilities and habit of hard work will benefit him in the master's program. I am confident that he will succeed in his career and achieve excellence. Thus, I highly recommend his admission to your university.

Sincerely,

Assistant Professor,

Information Technology Engg. Dept.,

VGEC, Chandkheda, Ahmedabad-382424

Om Mehta

Assistant Professor,

Information Technology Department,

Vishwakarma Government Engineering College, Chandkheda, Ahmedabad.
